Experience

Work-study program - MVP

We had to recreate an application developed in C# using Web technologies. My job was to set up an internal communications module.
In-depth knowledge of : PHP (WebServices), JavaSript, HTML, CSS

Web application internship - Linkso

I had to create a full-stack password management application communicating with numerous services, such as the Office API and Apache Guacamole.
Notions learned: Django, React, WebSockets, APIs

HeavenHaven website - IUT 2 Grenoble

Our goal was to offer a private island auction site. My role was project manager and front-end developer.
Estimated workload: around 200 hours.
Notions learned: React, Project Management

OxOBDE website - IUT 2 Grenoble

Notions learned: Native Javascript, Dark Theme, Sass
